HOLLAND GROWN TULIPS

Tulips may be planted from 1st October until January. They should be planted 5 to 6 inches deep and 5 to 6 inches apart. A dressing of bonemeal mixed into the depression after digging is beneficial. The bulbs should be lifted every two or three years or they become crowded and give small flowers. When the old flower stems are turning yellow, the bulbs may be taken up, dried and stored until planting time. Tulips like a place in the sun in a rich loamy, well drained soil.

DARWIN

Darwin Tulips are distinguished by their tall stems and beautiful cup shaped flowers. They bloom during the month of May about the same time as the Cottage and Breeder Tulips.

SHUKSAN—Starlike flower of soft buff yellow with brown spots. Reflexed petals roll back when in full bloom. **50c ea.**

WESTERN SUNSET—Vigorous hardy fool-proof lily that does well in sun or shade. Sunset red with brown spots. **50c ea.**

EVERGREENS

Most people have more time in the Fall of the year to do their landscaping and transplanting than in the busy days of Spring. The weather is often in favor of Fall planting. Evergreens and Shrubs do excellently when set out anytime after September 1st. They may be set out successfully as long as the ground isn't frozen.

HEMLOCKS

The Hemlock has more uses than any other evergreen. It is superb when used either as hedge, screen, specimen, or foundation planting. It can be pruned to almost any desired shape. It will grow in shade or sun. The soft graceful foliage is always a pleasure to behold. **3 ft. \$5.50.**

NORWAY SPRUCE

Makes a beautiful specimen. Tree grows almost perfect shape. Broad pyramidal type with horizontal branches. Beautiful for front or back yard. Not recommended for foundation plantings. **30 to 36 in. \$3.25; 3 to 4 ft. \$4.25.**

TAXUS-YEWS OUTSTANDING

Bug resistant—Disease Resistant—Thrives in Shade or Sun.

TAXUS CUSPIDATA (Spreading Yew)—A beautiful spreading type of evergreen that will grow in sun or shade. It withstands heat and cold, can be pruned easily, and is disease and bug free. **15 to 18 in. \$4.75; 18 to 24 in. \$5.50.**

TAXUS UPRIGHT—An upright type of evergreen, easy to grow, easy to trim, easy to keep looking "Out of this World." It grows in shade or sun, is disease and bug free. **24 to 30 in. \$5.50.**

NORWAY SPRUCE

PYRAMIDAL ARBOR VITAE

Beautiful flat leaved evergreens growing in a narrow conical shape. A semi-tall stately growing Shrub. **3 to 4 ft. \$3.25.**

GLOBE ARBOR VITAE

This arbor vitae is globe shaped, and like all arbor vitae, the foliage is of flat pressed leaves, and it enjoys a moist sunny location. It is excellent for front line plantings, also in urns and vases, especially where symmetry is desired. **18 in. \$3.00.**

GOLDEN ARBOR VITAE

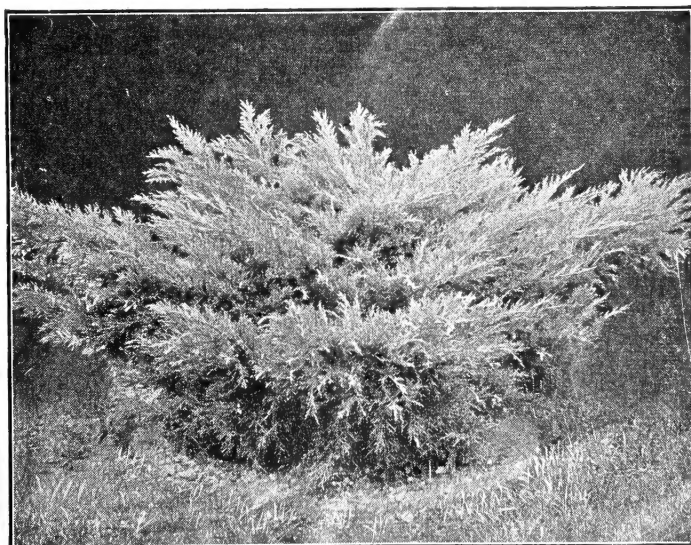

A very popular dwarf compact evergreen with a golden color. Can be used in urns, small gardens, cemetery lots, or foundation plantings. Extra nice. **18 in. \$3.25.**

PFITZER JUNIPER

One of the most popular of all foundation plantings—Deep green color—it has a spreading habit—it grows most anywhere except deep shade. **18 to 24 in. \$3.25.**

IRISH JUNIPER

A tall upright growing evergreen slender conical shape, bluish green color. Excellent foundation plant. **3 to 3½ ft. \$3.25.**

PFITZER JUNIPER

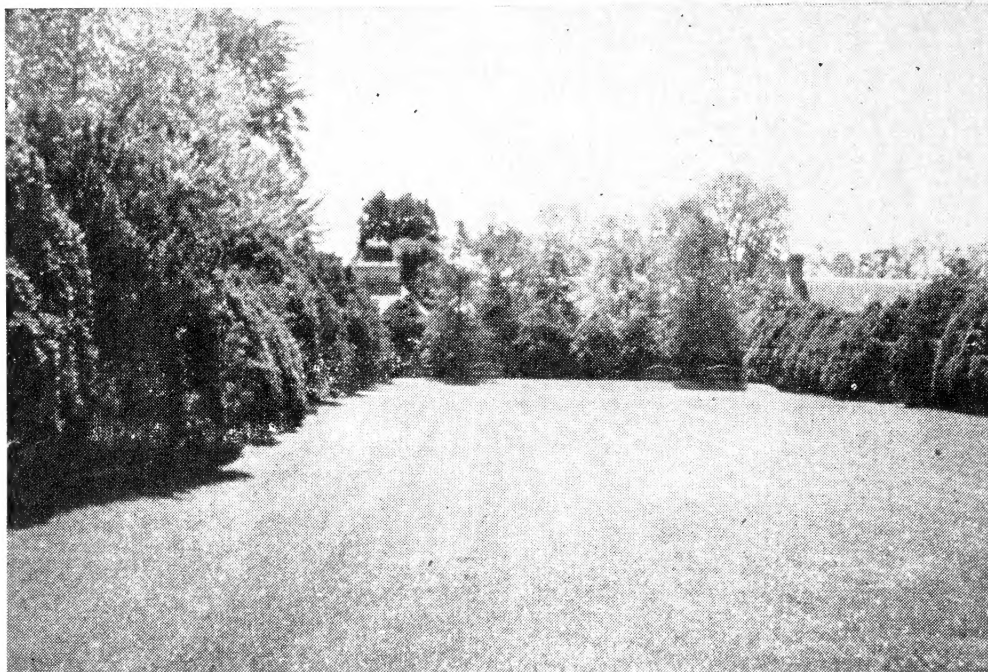

LAWN FACTS

LAWN SEED—Bluegrass, Red creeping fescue, Redtop, Chewings Fescue, Bent or all good deep green, permanent turf grasses. Using a mixture of these is preferable to a straight sowing of either.

SEEDING—Approximately 3 lbs. per 1000 sq. ft. of lawn is the recommended rate of sowing. Fertilizing before sowing the seed and watering afterwards is important. The ground must not be permitted to dry out until after the seed is up.

FERTILIZING—A complete fertilizer such as Vertagreen or Vigoro, or an organic fertilizer such as Sheep manure should be applied twice yearly, Spring and Fall. A heavy watering after fertilizing is a good, and sometimes absolutely necessary practice.

WATERING—Early morning waterings are more desirable than evening, especially in cases of bent or fescue lawns which are susceptible to lawn diseases. Infrequent heavy waterings are more beneficial than frequent shallow ones.

LAWN GRASSES

The FALL is an ideal time for preparing your lawn and sowing grass seed. This is especially true in the case of shady locations. By sowing the seed in the FALL you give the grass a chance to get started and well rooted when the vitality of the surrounding trees is declining. All the grasses listed below may be sown anytime beginning Sept. 1st.

LOSE'S SURE CROP LAWN GRASS—This grass is a carefully blended mixture of high grade Bluegrass, Red Top, Rye Grass, and Dutch White Clover, designed to give you the best lawn, in the quickest time, and under most weather conditions. Ideal for making a quick, permanent, deep green and velvety lawn. 95c lb., 5 lbs. \$4.50, 10 lbs. \$8.50, 20 lbs. \$16.50.

LOSE'S SURE CROP SHADY LAWN—A carefully blended mixture of grasses especially adapted to growing in shady spots, under trees, or on the shady side of the house. Since trees take a lot of plant food out of the soil it is especially important that you work in at least 4 lbs. of Vigoro, or 6 lbs. of Sheep Manure per 100 sq. ft., and water frequently in the summer. Fall sowing of this seed enables the grass to get a good start while the trees are dormant. \$1.00 lb., 5 lbs. \$4.75, 10 lbs. \$9.00, 20 lbs. \$17.50.

KENTUCKY BLUE GRASS—King of Grasses—Unequalled for making a beautiful thick compact turf when conditions are favorable. Germination is slow, and if quick lawn is desired should be sown along with faster germinating grasses. Blue

grass prefers soil of high fertility, so if your ground is poor be sure to use fertilizer or manure. \$1.10 lb., 5 lbs. \$5.25, 10 lbs. \$10.00, 20 lbs. \$19.50.

LOSE'S WINTER GRASS—This mixture of grasses is especially adapted to giving a quick thick, deep green coverage for the winter. It is just as satisfactory for shady locations as open places. 40c lb., 5 lbs. \$1.75, 20 lbs., \$6.50.

RYE GRASS—Unexcelled for rapid growth and immediate effect. Does not make a permanent lawn unless mixed with other grasses. Excellent to give a beautiful green effect all winter. 25c lb., 5 lbs., \$1.15, 20 lbs., \$4.25.

PERENNIAL RYE GRASS—The somewhat darker green finer blade makes the perennial rye grass more desirable for lawns than the domestic rye grass. Very quick growing. 35c lb., 5 lbs. \$1.65, 10 lbs. \$3.00, 20 lbs. \$5.75.

DUTCH WHITE CLOVER—A perennial clover used extensively for lawns in a mixture. \$1.15 lb.

POA TRIVIALIS—Also known as Rough Stalk Meadow Grass or Blue Grass of the Shade, since it is particularly adapted to shady places. Does not withstand drought as well as Blue Grass, so its ideal location would be a moist shady spot. \$1.15 lb., 5 lbs. \$5.50, 10 lbs. \$10.25.

CREEPING RED FESCUE—Excellent for shade. Thrives on all types of soil, even dry sandy bottom soil. Makes an extremely tight sod of fine needle-like deep green leaves. Is not easily winter-killed and is ideal for use on lawns, golf courses, airports, cemeteries, and playgrounds. \$1.25 lb., 5 lbs. \$6.00, 10 lbs., \$11.50.

FALL FERTILIZERS

5 lbs. 53c; 10 lbs. 95c; 25 lbs. \$1.70; 100 lbs. \$4.55. An excellent complete all around plant food.

BONE MEAL

Excellent for roses and general garden use. High in fertilizing value but releases its plant food slowly.

HARDY ANNUAL FLOWER SEEDS

Nature provides for the perpetuation of many of our flowers by their dropping
seed in late Summer or Fall. You are therefore planting close to Nature in
planting your hardy annual flower seeds in the Fall. If you want early bloom-
ing flowers next Spring, we recommend sowing your seed this Fall.
